ABOUT AHPI - TAMIL NADU CHAPTER

The Association of Healthcare Providers India — Tamil Nadu Chapter (AHPI-TN) is the first independently registered state chapter of AHPI India, a national not-for-profit organisation representing approximately 20,000 hospitals and healthcare institutions across the country. AHPI-TN serves as the collective voice of Tamil Nadu's private healthcare provider community — from large multi-specialty hospitals and teaching institutions to single-specialty centres and nursing homes across every district of the state.

Since its establishment, AHPI-TN has worked tirelessly to strengthen the private healthcare ecosystem of Tamil Nadu through advocacy, collaboration, and member-driven initiatives. The chapter engages closely with the Tamil Nadu government, regulatory authorities, insurance bodies, and national health agencies on matters of policy, compliance, quality, and workforce development — ensuring that the concerns and aspirations of healthcare providers across all tiers are heard and addressed at the right forums.

At the heart of AHPI-TN's work is a commitment to making every member institution stronger, smarter, and more sustainable. The chapter drives focused initiatives across four key areas:

Advocacy

Government Relations

Upskilling & Capacity Building

Publishing

AHPI-TN ensures that Tamil Nadu's private hospitals, which deliver the majority of the state's healthcare are heard, represented, or protected when governments make policy, insurers set rates, or regulators issue mandates.

AHPICON

AHPICON is more than a conference, it is the annual movement to unite Tamil Nadu's healthcare providers, amplify their collective voice, and drive the quality, policy, and innovation agenda of private healthcare in the state.
